

THEATRE AURORA

Annual General Meeting Operations Report

June 21, 2021

Over the past year the new VP of operations has facilitated the following.

NOTE: the building is in fair repair with some rough and aged areas that we are actively pursuing to bring upto today's standards. This includes the lobby, office and bathroom area.

- The roof over the North end of the building has been replaced. This includes the removal and replacement of all the plywood and shingles
- The props room sump pump has been replaced
- Both change rooms, respective bathrooms and the crossover have been completely demolished. Renovations continue to be worked on by volunteers (Grand re-opening/unveiling date to be announced)
- A topographical survey of the building a respective connected property has been completed to aid with facilitation of lobby and vestibule renovation plans
- Architectural drawings have been ordered with the design ideas for the major renovations of the lobby, office and bathroom areas to include "A jewel of an entrance way vestibule"
- A team of paranormal investigators attended the theatre and have confirmed our suspicion that yes the theatre is haunted by an entity that has identified himself as Adam, a young boy from 1897. A toy horse and shelf has been installed on stage left
- Our pest / rodent infestation has been addressed with little to zero activity being noticed now
- A second sea can at the rear of the build for storage is being investigated

Thank you.
