

## THEATRE AURORA

### Annual General Meeting – VP Operations Report

June 3, 2023

In my role as Vice President of Operations, I am pleased to provide an update on our efforts to maintain and enhance Theatre Aurora's infrastructure this past year.

One of our most significant achievements was the completion of the lobby upgrade, including the installation of a brand new Accessible All Gender Washroom. This upgrade was made possible by a generous grant from the Trillium Foundation and signals our commitment to inclusivity and comfort for all our guests.

Our routine maintenance program continued throughout the year, with the replacement of light receptacles and outside lights. These essential updates ensure the safety and visibility of our theatre and contribute to the longevity of our facilities.

Looking ahead, we face some challenges that require our attention and resources. We have noticed a series of water leaks, which have been traced back to the need for roof repairs and potentially a full roof replacement. The integrity of our theatre's structure is paramount, and we take these concerns very seriously. We are currently in the process of obtaining quotes and recommendations from professional roofing contractors to determine the most effective course of action. Our intention is to undertake the necessary repairs as soon as possible, with minimal disruption to our theatre schedule.

Thank you for your understanding and support as we navigate these necessary improvements. Ensuring the longevity and safety of our theatre remains a top priority, and we are committed to making the necessary investments to preserve our beloved venue for many years to come.

Respectfully submitted,

Nick Butler  
VP Operations
